

Acidosis and Heart Disease

Our blood must stay within a narrow range of pH (acid and alkaline levels) in order to function correctly and carry oxygen. In order to do this, our blood takes liquid acids and changes them into un-dissolved solid forms: cholesterol and crystallized uric acid.

Cholesterol is used to line the walls of your blood vessels to protect them from structural damage caused by strong acids in the blood. These acids are the result of a typical acidic diet. Overtime, the protective cholesterol begins to build up excessively and clogs the arteries. This leads to high blood pressure and an overstrained heart. Furthermore, the crystallized uric acid leads to gout.

"Dr. Kancho Kuninaka, one of the pioneers of the alkaline water treatment in Japan, states that virtually without exception, the patients with high blood pressure have an acidosis condition." Reverse Aging ©1990 by Sang Whang

So what should you do?

GET ALKALIZED!

Drink Alkaline Health Water from your very own LIFE Ionizer to neutralize acid in your body and become alkaline.

Take a Step Toward Better Health

Our LIFE Ionizers have the highest pH and ORP levels, have dual filters, and are warranted for 5 years. Better yet, you save thousands of dollars it would cost to purchase bottled water during that time.

Prevent health problems before they happen, and correct problems you already have! At Life Ionizers, we're changing the world, one glass at a time. Our miracle water is the healthiest water around! Try it today and see.

Financing Available

The TRUTH About Your Heart & Acidity

Get Heart Smart...Get Alkaline!

Anti-Aging • Anti-Oxidant • Alkaline H₂O

What is Alkaline Ionized Water?

Ionized water is energy-rich, free radical fighting water produced from the ordinary tap water. As your tap water passes through a LIFE Ionizer, it is divided into two streams, one alkaline and the other acidic, and micro-clustered for maximum hydration and cellular detoxification.

Life Ionizers rely on a unique ionization process utilizing our patented chamber system.

STEP 1 & 2

Filtration and Ionization

Our 12-step filtration system remove pollutants and contaminants and then ionizes the water to create anti-oxidants (ORP)

STEP 3 & 4

Alkalization and Micro-Clustering

The water is then sent through titanium plates which divide the water into acidic and alkaline minerals streams. The alkaline water is for drinking and is then micro-clustered for better hydration and detoxification.

The Acid Problem

- Do you consume meat, dairy products or processed grains?
- Do you drink soda, tea, coffee or bottled water?
- Do you have stress in your life?

If you answered yes to these questions, you probably suffer from metabolic acidosis, which means your pH level is overly acidic (urine pH 5-6). Acidic overload on the body's systems not only compromises our liver detoxification mechanisms, but also our overall health. In the process of converting acidic waste to harmless neutralized by-products, the body is depleted of essential minerals from cells and bones. Thankfully, there is an easy solution that accelerates the excretion of ingested poisons and restores balance to the body.

The Alkaline Solution

Drinking 6-8 glasses of alkaline water is the best way to hydrate better, neutralizes free radicals, and enhance detoxification. (An alkalinizing process called ion trapping allows the body to boost urinary excretion of weak acids in alkaline urine.) The best solution is to utilize a home water filtration system that not only filters the water, but adjusts the pH ionizes the water, and creates smaller water molecule clusters.

Here's To Your Health!

Admit it! You are much more likely to drink 3 to 4 liters a day of our great tasting water than you are to make life-long radical changes to your diet to make it consist of 80% raw fruits and vegetables - which is what is needed to correct your body's acid/alkaline balance through diet changes. Prevention is the key. The body's major nutrient is water, so drink alkaline mineral LIFE water for optimum health.
